The course is an overview of the basic concepts of the pharmacological treatment of various diseases affecting major body systems. Starting from a brief review of the anatomy and pathophysiology of a given system it will look at the basic pharmaceutical drugs used to treat conditions of the given system in terms of how they are absorbed and affect the system in terms of treatment outcomes and side-effects.

**Lecture Lab Hours: 2 / 4.**

**Semester Hour Credit: 3**

**Prerequisite:** None

**Text:** Fundamental Pharmacology for Pharmacy Technicians, 2<sup>nd</sup> Edition, Jahangir Moini, Cengage Learning.

2. Have knowledge of basic terms related to drugs and drug therapies
3. Be able to describe what happens when drugs enter the body and how they work
4. List the major classifications of drugs that affect each body system
5. Have knowledge of commonly used drugs and how they work

**Assessment: Lecture**

The assessment will be conducted by using a research paper to discuss the general topic of pharmacology and how drugs are used as medicine and processed in the body.

**Target: Lecture**

1. At least 90% of the student will score 75% or higher on the essay.

**Assessment: Lab**

The assessment will be conducted by using an exam: Test questions in exam will cover a specific body system and have short answer discussion questions reflecting conditions related to that body system and drugs used in treatment of conditions unique to that body system.

**Target: Lab**

- At least 90% of the student will score 75% or higher on the exam.
